

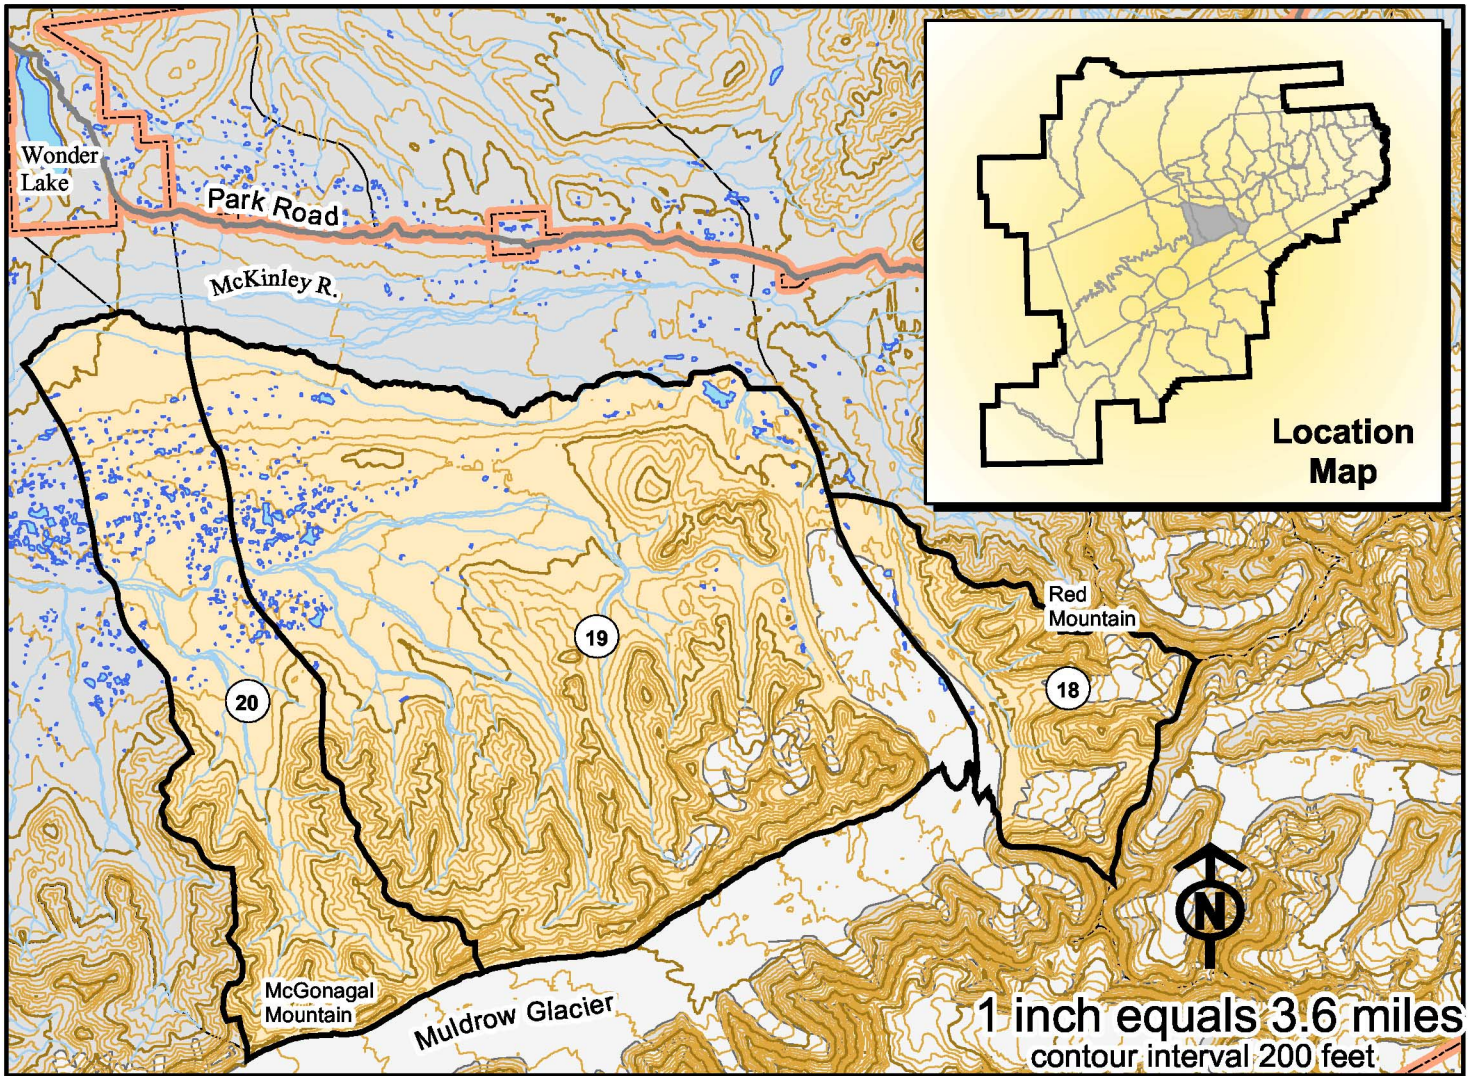

Map 2-25 - (Units 18, 19, and 20)

Upper Glacier Creek, Pirate Creek, McGonagal Pass (Unit 18,19,20)

Rolling hills, tundra ponds, glaciers, and rocky foothills. Low shrub: birch, willow, and sedge communities. Rock, snow, and ice at higher elevations. Important caribou habitat. Raptor sites throughout region. Wolf dens and bear dens. Historic mountaineering camp along Cache Creek.

Wilderness experience is good in summer, excellent in winter. Very low encounter rates, especially away from the McGonagal Pass trail and Glacier Creek. Air traffic may be frequent and natural sounds are interspersed with noise from engines.
